

Tentative Program

(for the mini-conference on computational aspects of representation theory)

Friday, 8th Dec.

1.30pm: *Coffee and cake*, Room 203

2.00–2.30pm: *G. Pfeiffer (St. Andrews)*, Parabolic Subgroups, Fo5

2.35–3.05pm: *J. Rosenboom (Essen)*, t.b.a., Fo5

4.50–5.20pm: *A. Henke (Heidelberg)*, Computing modular characters of $3.O'N$, AS

5.25–6.00pm: *G. Röhrle (Bielefeld)*, t.b.a., Fo5

6.05–6.35pm: *R. Wilson (B'ham)*, Library of standard generators, Fo5

7.00pm– : *Research: Cambridge Style!*, Labyrinth

Saturday, 9th Dec.

10.00–10.30am: *F. Lübeck (Heidelberg)*, Computation of unipotent characters, AS

10.35–11.10am: *R. Marsh (Bielefeld)*, Quantum groups and canonical bases, AS

11.15–11.45am: *R. Camina (London)*, Subgroups of the Nottingham group, AS

11.50–12.20am: *O. Düvel (Heidelberg)*, On Donovan's conjecture, AS

12.30am–2.15pm: *Lunch break*

2.20–2.50am: *J. Michel (Paris)*, Lusztig restriction of Gelfand-Graev characters, AS

2.55–3.20pm: *J. Gruber (Heidelberg)*, Decomposition numbers of $SL_n(q)$, AS

3.25–4.00pm: *Coffee break*

4.00–4.30pm: *S. Reiter (Heidelberg)*, GAR realizations of linear and unitary groups, AS

4.35–5.05pm: *K. Bremke (Boston)*, t.b.a., AS

5.10–5.45pm: *B. Baumeister (Halle)*, Computer free proof of existence of J_3 , AS

5.50–6.25pm: *S. Linton (St. Andrews)*, Recognizing $GL_n(2)$ as a group, AS

Anyone interested is welcome to attend.

gez. Geck, Lux.
